IDENTIFIERS	*North Carolina Community College System

ABSTRACT

Statistical information on the North Carolina Community College system is presented for the 1992-93 year, representing a summary of data collected from the 58 colleges in the system over the course of the year, as well as historical information from past years. Student enrollment tables provide information on enrollment by college and quarter, 1992-93; enrollment by program area, 1983-84 through 1992-93; number of students enrolled by program, 1988-89 through 1992-93; student enrollment by sex and race by type of program, 1992-93; curriculum and extension enrollment by age, race, and sex, 1992-93; students' home state and county, 1992-93; and student completions by curriculum program, 1991-92. Full-time equivalent (FTE) tables present data on average annual FTE from 1976-77 through 1992-93 and 1992-93 data on FTE by quarter; FTE in transfer, general education, technical, and vocational programs; curriculum programs subtotal; FTE in academic, avocational, and practical skills extension programs; FTE in community service, adult high school, adult basic education, compensatory education, and literacy programs; learning laboratory FTE; new and expanding industry program FTE; human resources development FTE; and self-supporting and recreational program FTE. The final set of tables provides 1992-93 information on staff, curriculum faculty, and extension faculty, including data on area of responsibility, years of service, highest degree earned, race, sex, instructional category of full- and part-time faculty, and record counts for all college staff by employment classification for a 5-year period. Definitions of data categories are provided. Appendixes provide graphs of much of the enrollment data. (ECC)

PREFACE

The North Carolina Department of Community Colleges presents the 28th volume of its Annual Statistical Report. This report contains statistical information about the North Carolina Community College System for the 1992-93 year. It represents a summary of the information collected from each of the fifty-eight colleges over the course of the year as well as historical information from past years. In most cases, the department has information available of a more detailed nature if the need arises.

The report is organized into logical units which represent information about students, FTE and staff. In addition, a set of appendices shows much of the data in chart form for the 1992-93 year and trends charts. In the case of student data, unduplicated headcounts are reported at all break levels. Care should be taken in combining numbers as unduplicated sub-totals may not add up to unduplicated totals. Reference should be made to the definitions section for clarifying how data should be interpreted.

The preparation of this report requires the work of many hundreds of persons in the community college system. From initial data collection, to reporting data to the department, to processing the data into the summary form presented here takes the work of many individuals and I extend my thanks to each one for their efforts. In particular, special thanks go to several persons on the department's Information Services staff for their work, including Shirley Carroll, Glen Johnson and Margaret Perry, who provided overall coordination for the project.

Steve Ijames

Steve Ijames, Director
Information Services

INTRODUCTION

This publication contains FTE and enrollment data for the 58 colleges in the North Carolina Community College System for the 1992-93 school year, summer quarter 1992 through spring quarter 1993. For comparative purposes, the totals for the 1991-92 and the 1990-91 school years are shown on most tables. Prior to 1970-71 the school year was defined as the period from the fall quarter through summer quarter. Historical student enrollment and FTE data are also given.

Sources of Data: There were five sources from which data were collected. Curriculum and extension registration data, Forms DCC 7-1 and DCC 7-2, provided the number of students and identified the curriculum program in which they were enrolled. Each student is counted only one time: see the definition of unduplicated headcount on page 6. Institution's Class Report data, Forms DCC 7-3C and DCC 7-3E, provided the number of FTE by major instructional area. College Staff/Faculty Information was summarized from Form DCC 7-8, and represents data as of October 1, 1992, (Fiscal Year 1992-93). Reference should be made to The North Carolina Community College System Educational Guide Chart for more detailed information regarding programs offered by the system.

Calculation of Full-time Equivalents (FTE): Since many of the students in the Community College System attend class on a part-time basis, it is desirable to equate them to "typical" full-time students. The full-time equivalents (FTE), representative of the amount of time the "typical" full-time student would attend class, was the means developed to standardize reporting. Several part-time students constitute only one FTE.

One full-time equivalent (FTE) is a student in membership for 16 hours of class, shop, or laboratory per week for 44 weeks, the full four-quarter school year. To determine the average annual FTE, the total membership hours reported for the year is divided by 704. Student membership hours for a quarter divided by 176 produce full-time equivalents for a given quarter.

Academic Extension Courses consist of single courses, each complete in itself, designed to serve the academic educational needs of adult citizens, including courses in humanities, mathematics and science, and social science.

Adult Basic Education (ABE) Programs includes courses at the elementary instructional level (through the eighth grade)--usually with emphasis on communicative, computational, and social skills--given to enable an adult or youth beyond the age of compulsory school attendance to raise his/her level of education, pursue a program of occupational training, and/or function more adequately as a citizen in a democratic society.

Adult High School Diploma (AHS) Programs consist of classroom instruction, or learning laboratory courses, or a combination of both designed to qualify a student for an adult high school diploma under an Agreement of Affiliation with a local public school system or to qualify a student successfully to demonstrate competency in the General Educational Development Tests (GED) and to receive a High School Equivalency Certificate from the State Board of Community Colleges.

Average Annual FTE is the average FTE of the four-quarters of summer, fall, winter, and spring for a given year.

Avocational Extension Courses consist of single courses, each complete in itself, which focus on an individual's personal or leisure needs rather than his occupation, profession, or employment.

Clerical includes staff whose assignments typically are associated with duties which are clerical/secretarial in nature. Staff in this category are responsible for internal and external communications, recording and retrieval of information (not to include computer operator/programmer), and other office work, such as bookkeeper, typist, data entry operator, bookstore clerk, library clerk (not recognized as a librarian), secretaries, etc.

College Transfer Education Programs consist of planned academic curriculum programs leading to an Associate in Arts (A.A.), Associate in Fine Arts (A.F.A.), or Associate in Science (A.S.) degree and designed to allow for transfer to the junior year of a senior college.

Compensatory Education (CED) Programs are designed to compensate mentally handicapped individuals for the lack of, or inadequate, education received before or during adulthood. The programs are highly individualized and fosters a maximum level of independent living in accord with personal ability through instruction in basic academic, community living, pre-vocational and other functional skills.

Community Service Programs consist of those extension programs that are directed to the academic, avocational, and development of personal skills of the community. Those classes offered in the academic extension, avocational extension, and practical skills extension are included in this general category.

Curriculum Programs include College Transfer, General Education, Technical and Vocational programs.

Extension Programs include New and Expanding Industry, and Self-Supporting Recreational programs in addition to the Regular Budget Extension program areas of Adult High School, Academic Extension, Avocational Extension, Occupational Extension, Practical Skills Extension, Adult Basic Education and Compensatory Education.

Faculty includes staff whose primary responsibilities are instructional and involve guiding/directing the learning experiences of pupils in an instructional environment.

General Education Programs consist of basic course work in English, literature, fine arts, philosophy, social science, science and mathematics leading to an Associate in General Education Degree (A.G.E.)or Certificate in General Education. They are designed principally for students who desire two years of general education beyond the high school level. This program is not principally designed for college transfer.

Human Resources Development Programs (HRD) are intensive and unified efforts to recruit, train, and place in employment or, optionally, vocationally train chronically unemployed or underemployed adults. The primary objective of the training component is to help the jobless trainee reorient himself or herself to the world of work, appreciate the effects of his or her behavior on others, and develop the basic academic and communication skills prerequisite to obtaining and maintaining employment.

Learning Laboratory Programs (LLB) consist of self-instruction using programmed texts, audio visual equipment, and other self-instructional materials. A learning laboratory coordinator has the function of bringing the instructional media and the student together on the basis of objective and subjective evaluation and of counseling, supervising, and encouraging persons working in the lab.

New and Expanding Industry Programs provide for the training needs of new industries which are moving into the state and also for existing industries undergoing a major expansion which result in the need for additional skilled manpower.

Occupational Extension Programs consist of single courses, complete in itself, designed for the specific purposes of training an individual for employment, upgrading skills of persons presently employed, and retraining others for new employment in occupational fields.

Other Administrators includes staff whose major responsibility is administrative and whose major activities impact instructional or non-instructional programs. Staff in this category normally report to a senior administrator and some descriptive titles might include director, assistant/associate dean, associate vice-president, or other titles.

Practical Skills Extension Programs consist of single courses, each complete in itself, designed to provide practical training for persons pursuing additional skills which are not considered their major or primary vocation but may supplement income or may reasonably lead to employment.

Preparatory or Developmental Extension Programs includes Adult Basic Education, Adult High School, Learning Laboratory and Compensatory Education programs.

Professional includes staff who are assigned to manage non-teaching functions. Educational minimum requirements would normally be a baccalaureate degree or its equivalent. Staff in this category would normally report to an administrator of an instructional or non-instructional program and some functional titles might include coordinator of ABE, computer systems analyst, recruitment coordinator, or other titles.

Regular Budget Extension Programs includes Academic Extension, Adult High School, Avocational Extension, Occupational Extension, Practical Skills Extension, Adult Basic Education and Compensatory Education.

Regular Budget Programs include all programs in the Curriculum (College Transfer, General Education, Technical and Vocational) and Regular Budget Extension Areas (Academic Extension, Adult High School, Avocational Extension, Occupational Extension, Practical Skills Extension, Adult Basic Education, and Compensatory Education).

Self-Supporting Recreational Programs are self-supporting courses which the college may provide at the request of the community but for which the college receives no budgetary credit. Athletic, game and hobby courses fall into this category. The cost of such activities are borne exclusively by the participants or some contracting agency.

Senior Administrators includes staff who are responsible for the overall executive and/or administrative direction of the college as a whole or of a major component of the college. This category includes the chief executive officer (president), and staff who normally report directly to the president and might have functional titles such as dean, vice-president, executive vice-president, or other titles.

Service/Maintenance includes staff whose assignments require limited degrees of previously acquired skills and knowledge and in which staff perform duties which result in or contribute to the comfort, convenience and hygiene of personnel and the student body or which contribute to the upkeep and care of buildings, facilities or grounds of college property. Some functional areas are cafeteria worker, truck driver, gardener, construction laborer, security personnel, maintenance worker, etc.

Skilled Crafts includes staff whose assignments typically require special manual skills and a thorough and comprehensive knowledge of the processes involved in the work, acquired through on-the-job training and experience or through apprenticeship or other formal training programs. Staff in this category would have titles such as mechanic, repairer, electrician, skilled maintenance, machinist, carpenter, printer, etc.

Special Credit Student is a student who takes one or more courses for credit but is not enrolled in a regular curriculum program.

Technical Curriculum Programs are designed to prepare individuals for employment, and completion of the curriculum leads to an Associate in Applied Science (A.A.S.) degree. These programs involve the application of scientific principles in research, design, development, production, distribution, or service.

Technical/Paraprofessional includes staff whose assignments require specialized knowledge or skills which may be acquired through experience or minimal academic work at an associate degree level. Staff in this category normally report to an administrative-level or professional-level person.

Unduplicated Headcount is the number of individuals enrolled in each curriculum or extension program. A student is counted in only one curriculum: therefore, the sum of the enrollment in each curriculum equals the total curriculum enrollment. However, in extension a student is counted in each extension program in which he is enrolled, but he is counted only once in each extension subtotal and extension total count regardless of the number of different programs in which he is enrolled. Because of this method of counting the extension enrollment, the sum of the enrollments in each program exceeds the total unduplicated extension count. Prior to 1971-72, extension students were counted only in the extension program in which they were first enrolled, regardless of the number of different programs in which they were enrolled.

Vocational Curriculum Programs consist of a series of courses which are designed to prepare an individual for employment in a specific occupation. These programs consist of a sequence of courses which generally can be completed in one year or less by a full-time student. Successful completion of a vocational curriculum program leads to a diploma or certificate.

**UNDUPLICATED HEADCOUNT is the number of individuals enrolled in each curriculum or extension program. A student is counted in only one curriculum; therefore, the sum of the enrollment in each curriculum equals the total curriculum enrollment. However, in extension a student is counted in each extension program in which he is enrolled, but he is counted only once in each extension subtotal and extension total count regardless of the number of different programs in which he is enrolled. Because of this method of counting the extension enrollment, the sum of the enrollments in each program may exceed the total unduplicated extension count. Prior to 1971-72, extension students were counted only in the extension programs in which they were first enrolled, regardless of the number of different programs in which they were enrolled.*

The information in this report is the result of a "snapshot" taken of college staff data bases AS OF 10/01/92, and may not accurately reflect the total number of part-time temporary staff employed through the entire year.

Employment is 1-12 months in length. The employment classifications of Full-time Permanent, Full-time Temporary, Part-time Permanent, Part-time Temporary which are listed on this report are determined by each college based on their definition of these terms.

Full-time Permanent and Full-time Temporary:
Any employee who is designated by the college as full-time.

Part-time Permanent and Part-time Temporary:
Any employee not designated as full-time.

The information in this report is the result of a "snapshot" taken of college staff data bases as of October 1 and may not accurately reflect the total number of part-time temporary staff employed through the entire year.

Employment is 1-12 months in length. The classifications of Full-time Permanent, Full-time Temporary, Part-time Permanent and Part-time Temporary which are listed on this report are determined by each college based on their definition of these terms.

(Full-time Permanent and Full-time Temporary -- Any employee who is designated by the college as full-time.)
(Part-time Permanent and Part-time Temporary -- Any employee who is not designated as full-time.)
